

# UI/UX Design for Android

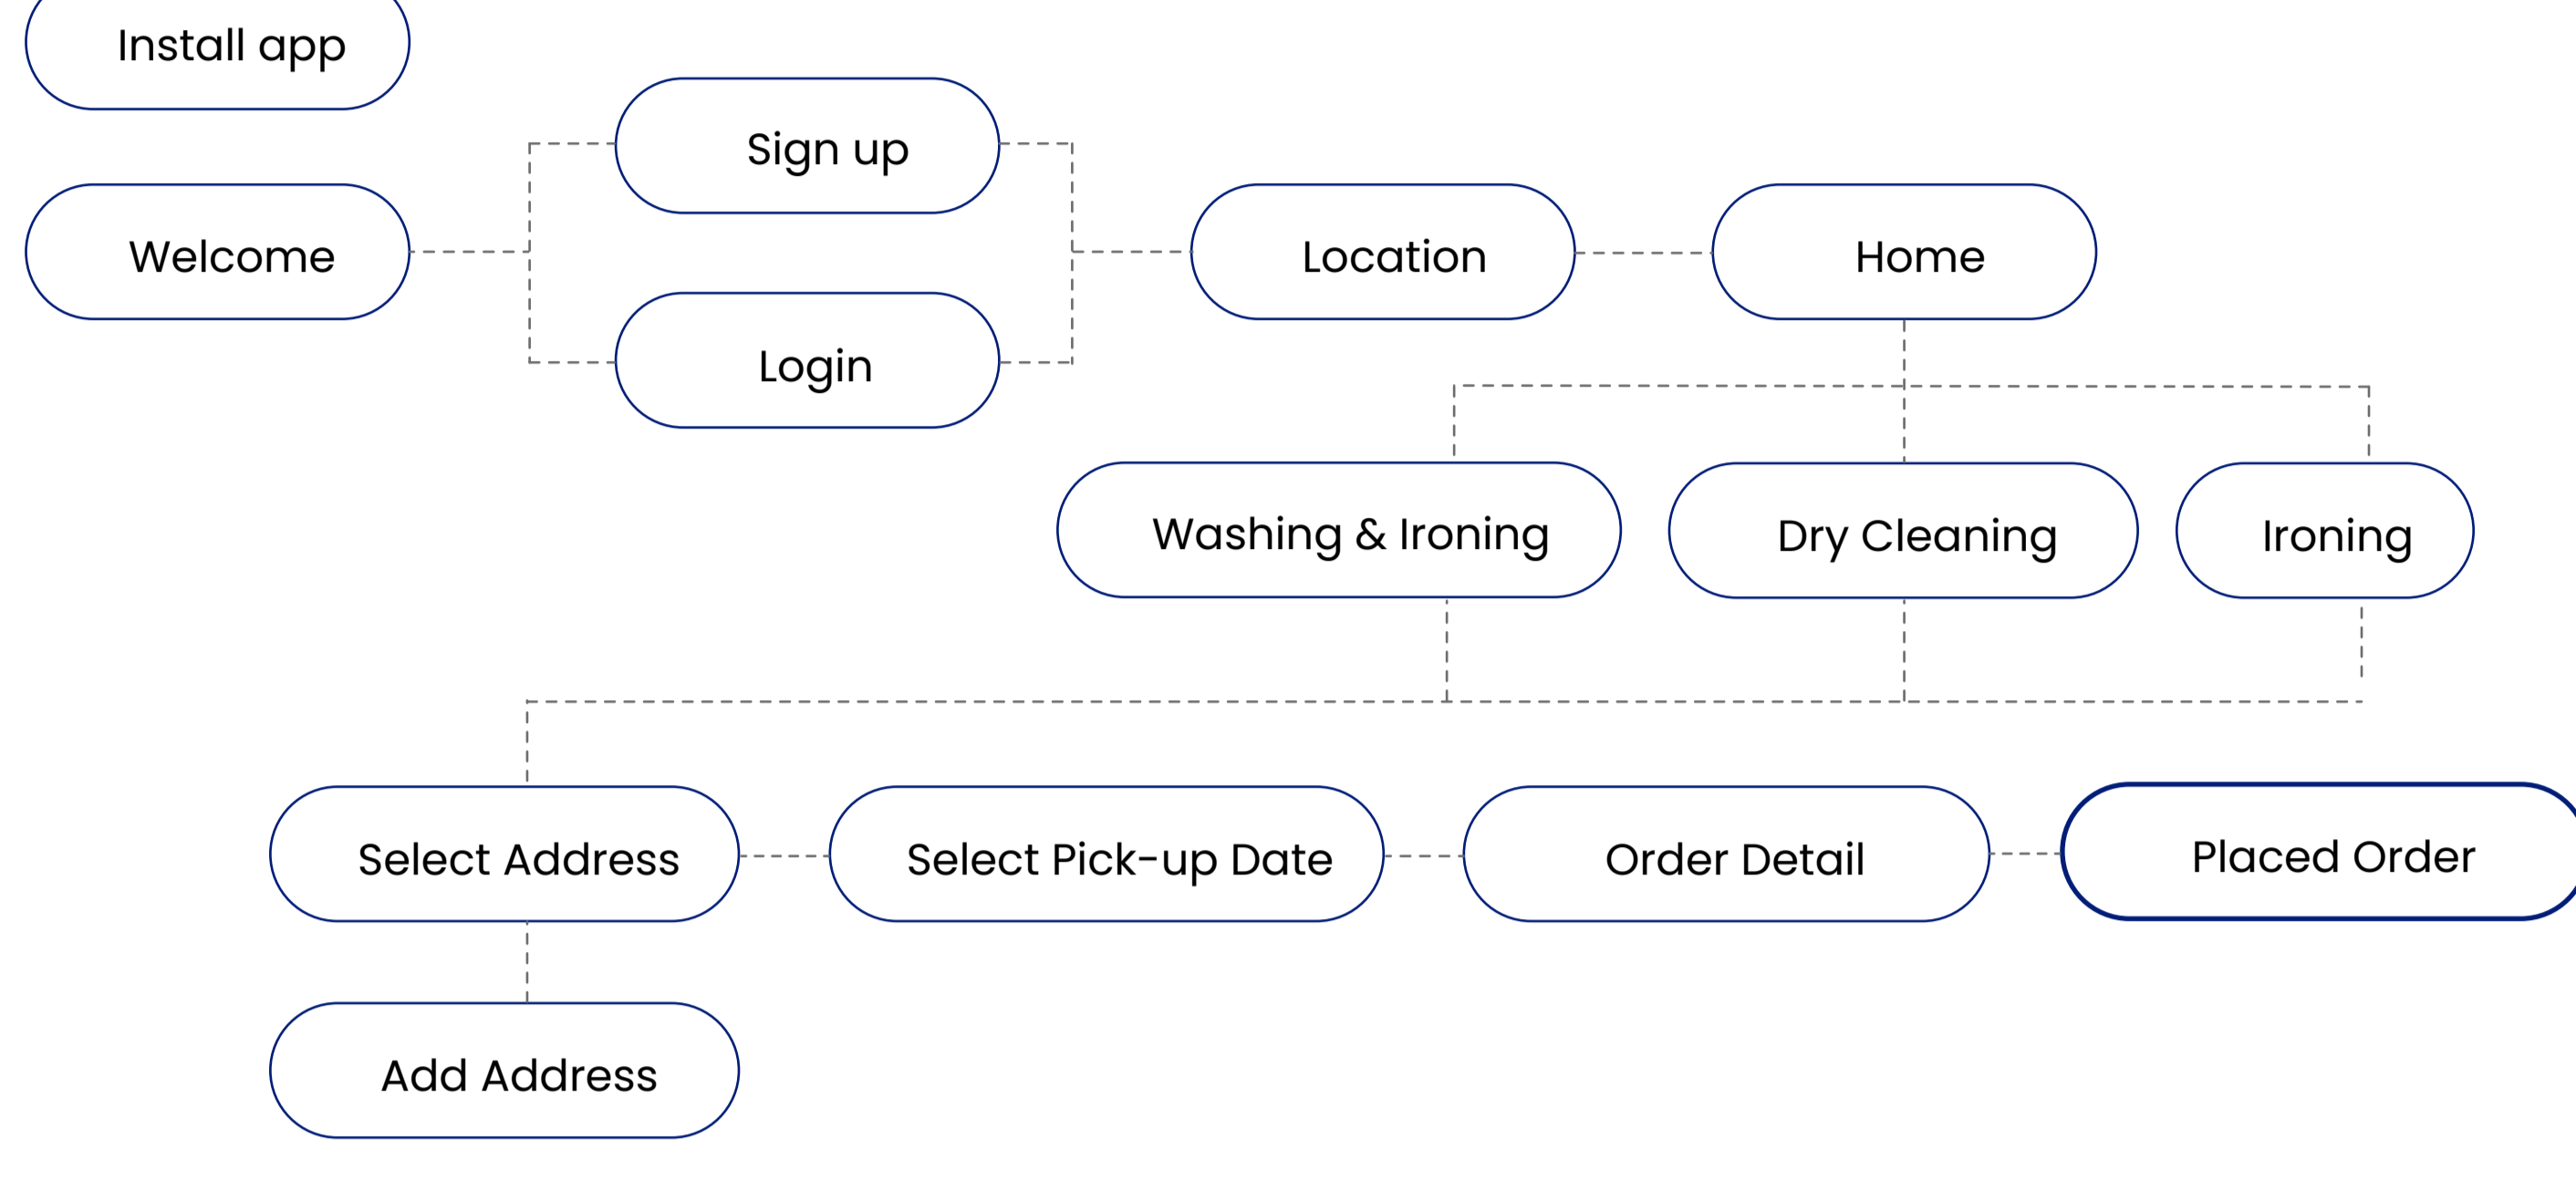

## About Project

BLANCO has created a simple & user friendly Mobile App, which is at the heart of the interaction / transaction, wherein with a click of a button the customer can schedule the pick up of laundry at a time comfortable to the customer, the app enables the customer to see the online status of their laundry and the Online App also provides a convenient option to pay online.

## User Flow

Simple flow allows users to book desired laundry services.

## Sign Up

Sign up if you are new to app. page designed simple and clean as much as possible.

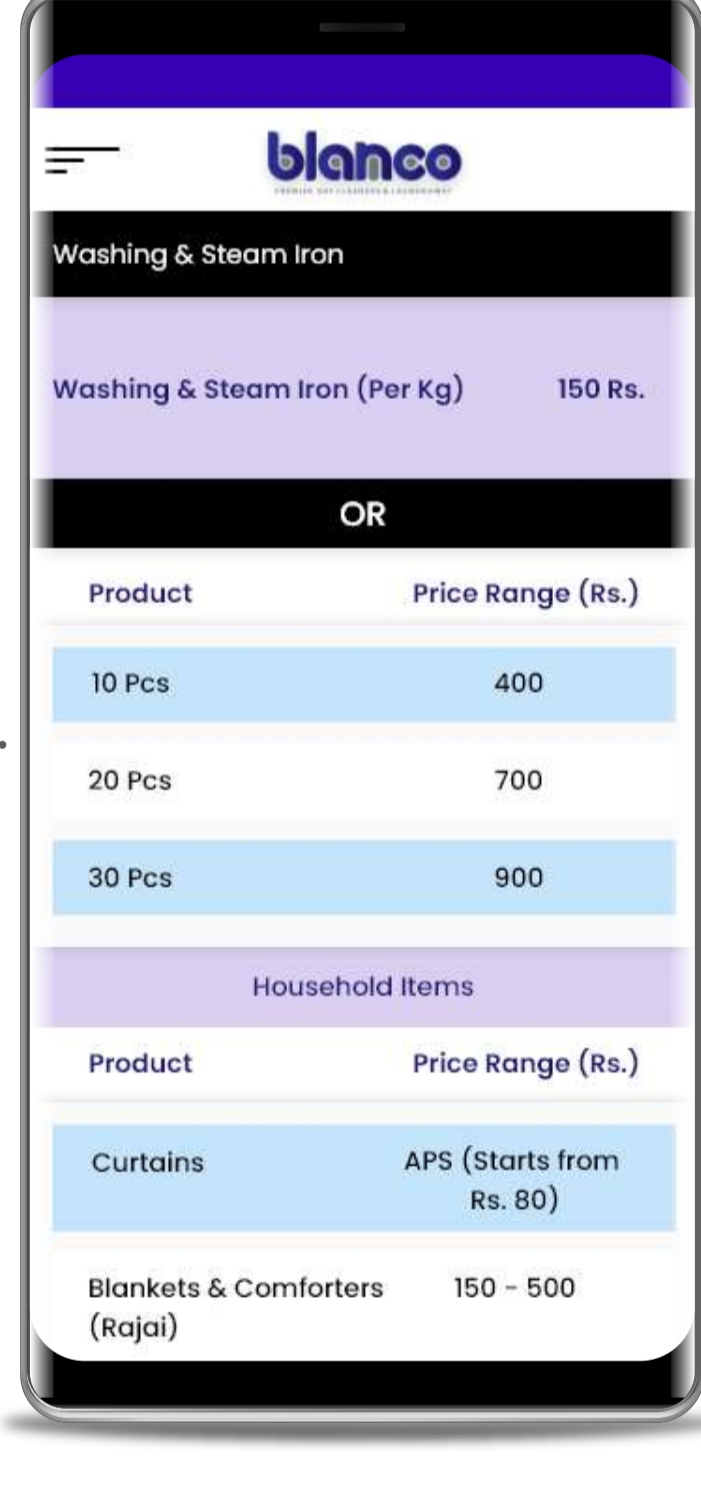

## Home Page

On the home screen users can easily find our three services on top of that all the price list of services. We also provide small notification bar for users. Users also find exciting offers through banners.

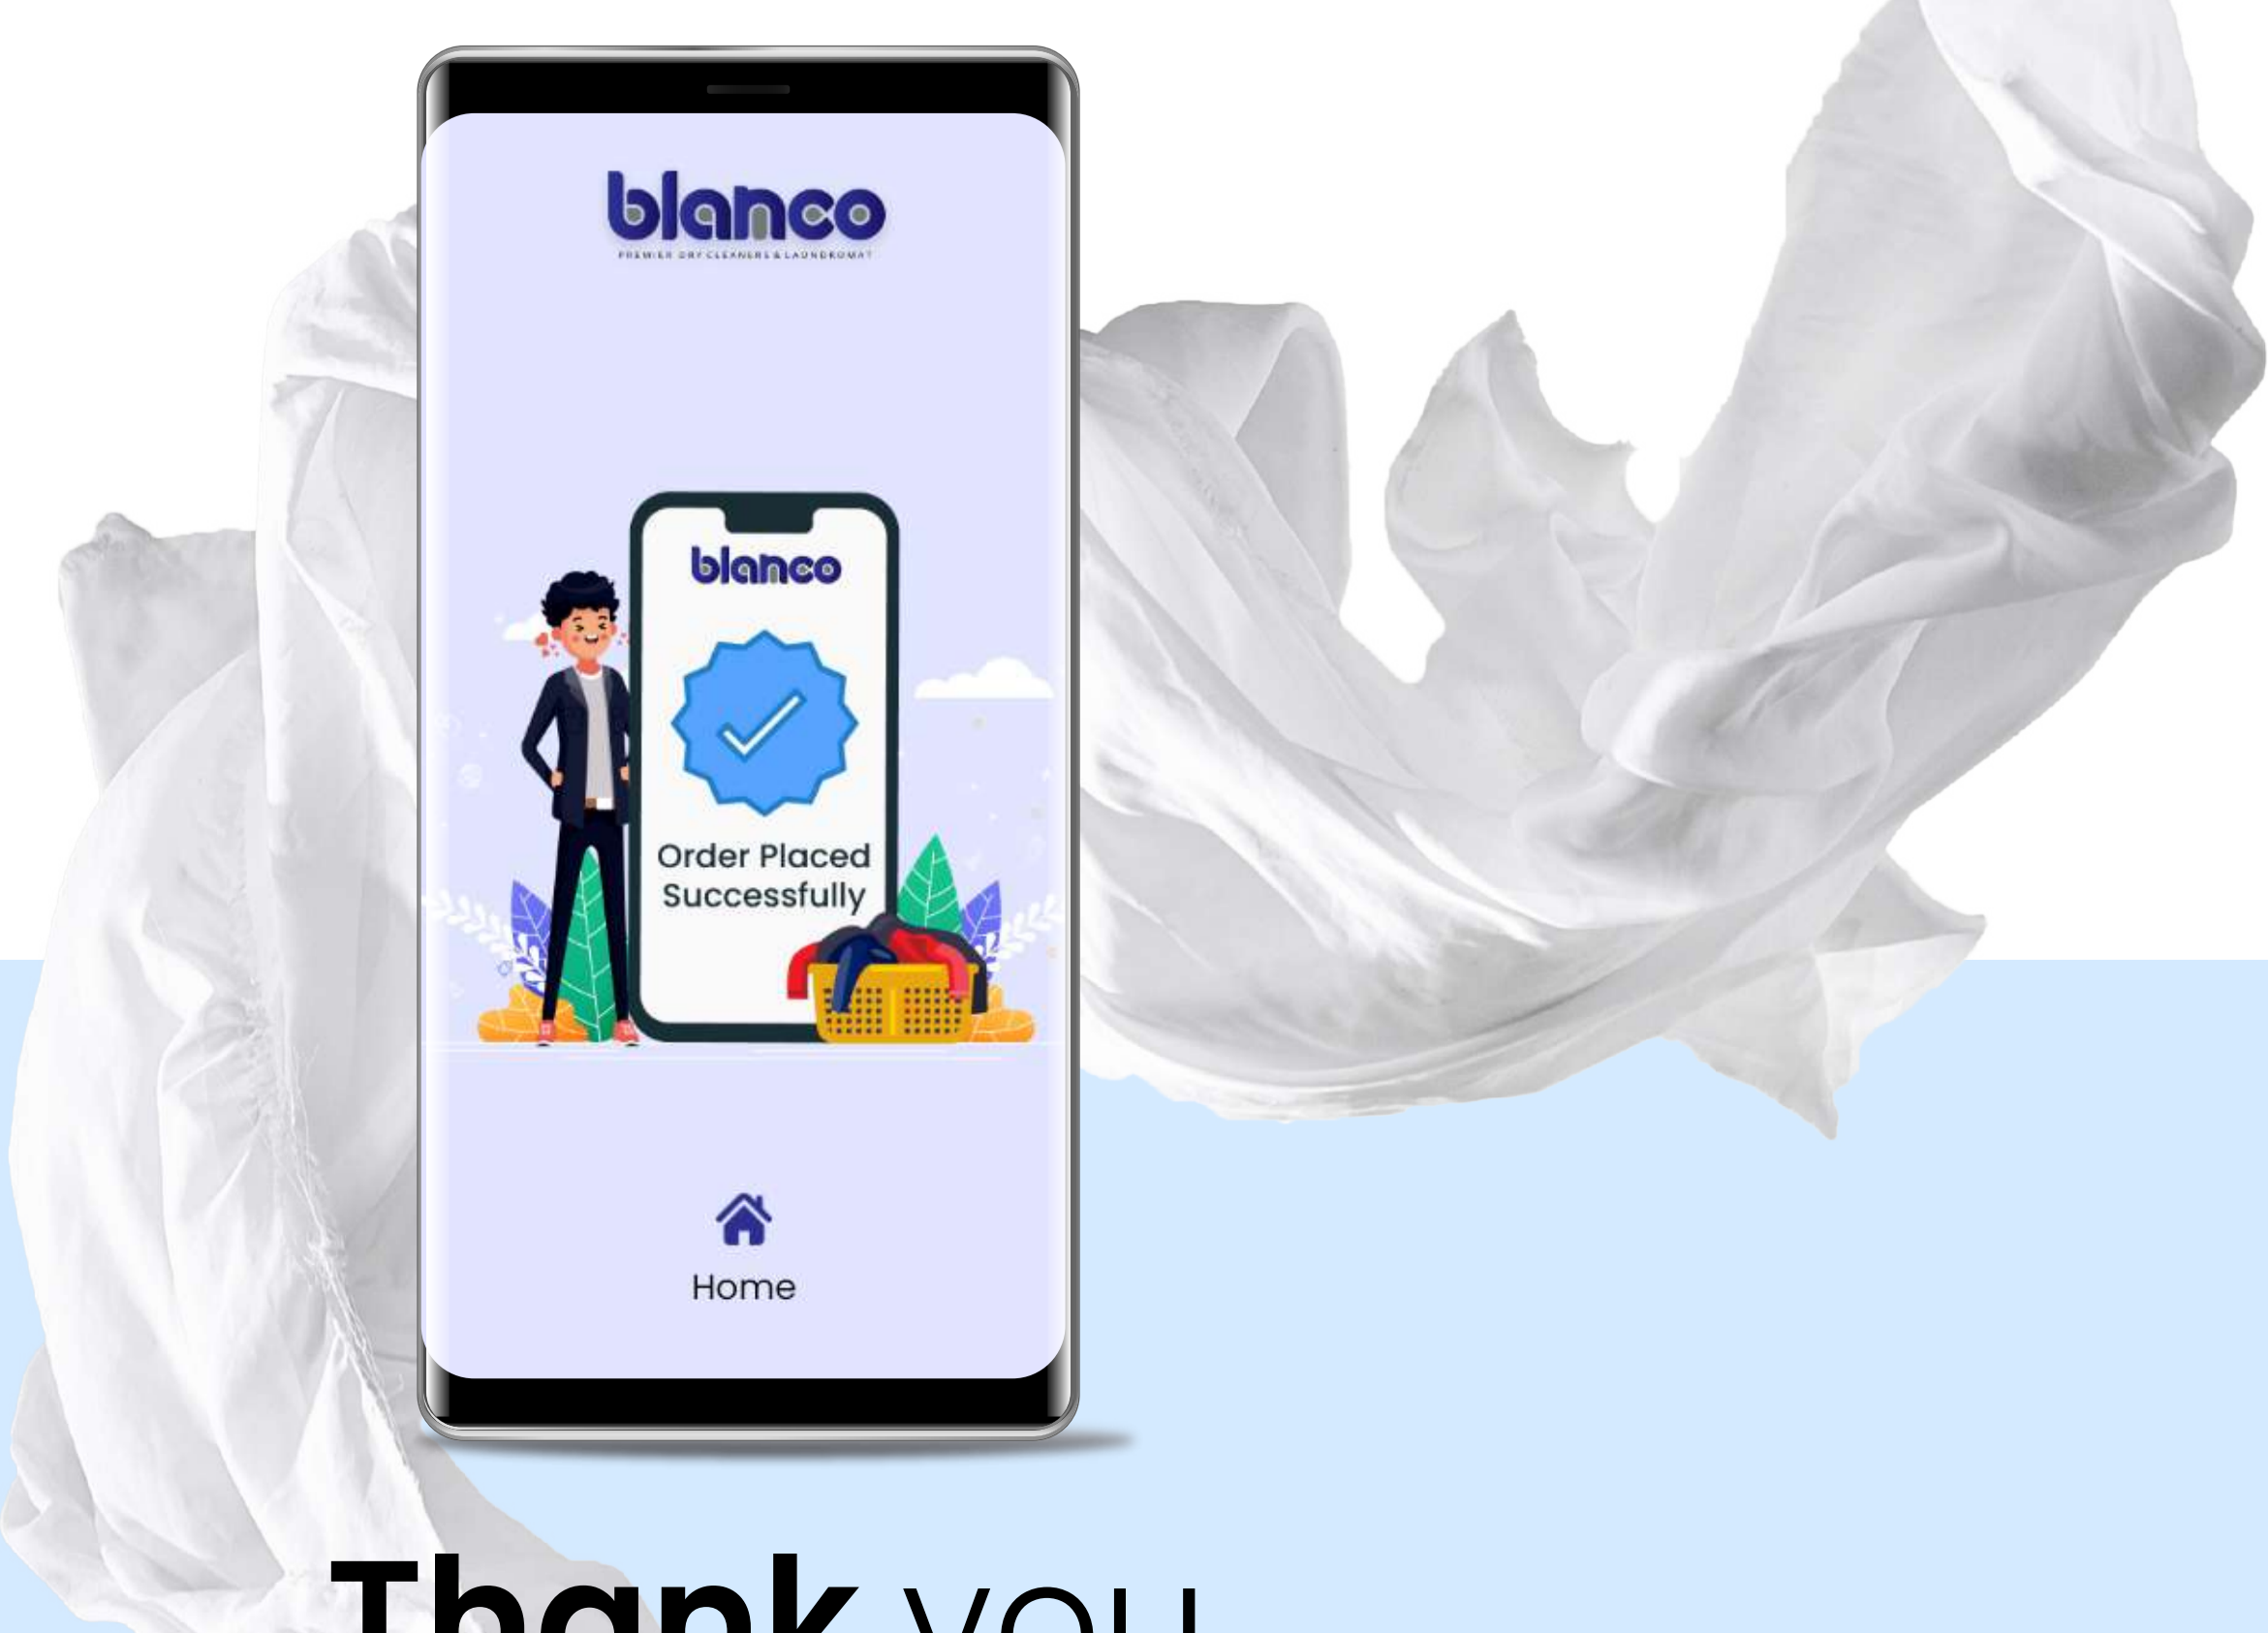

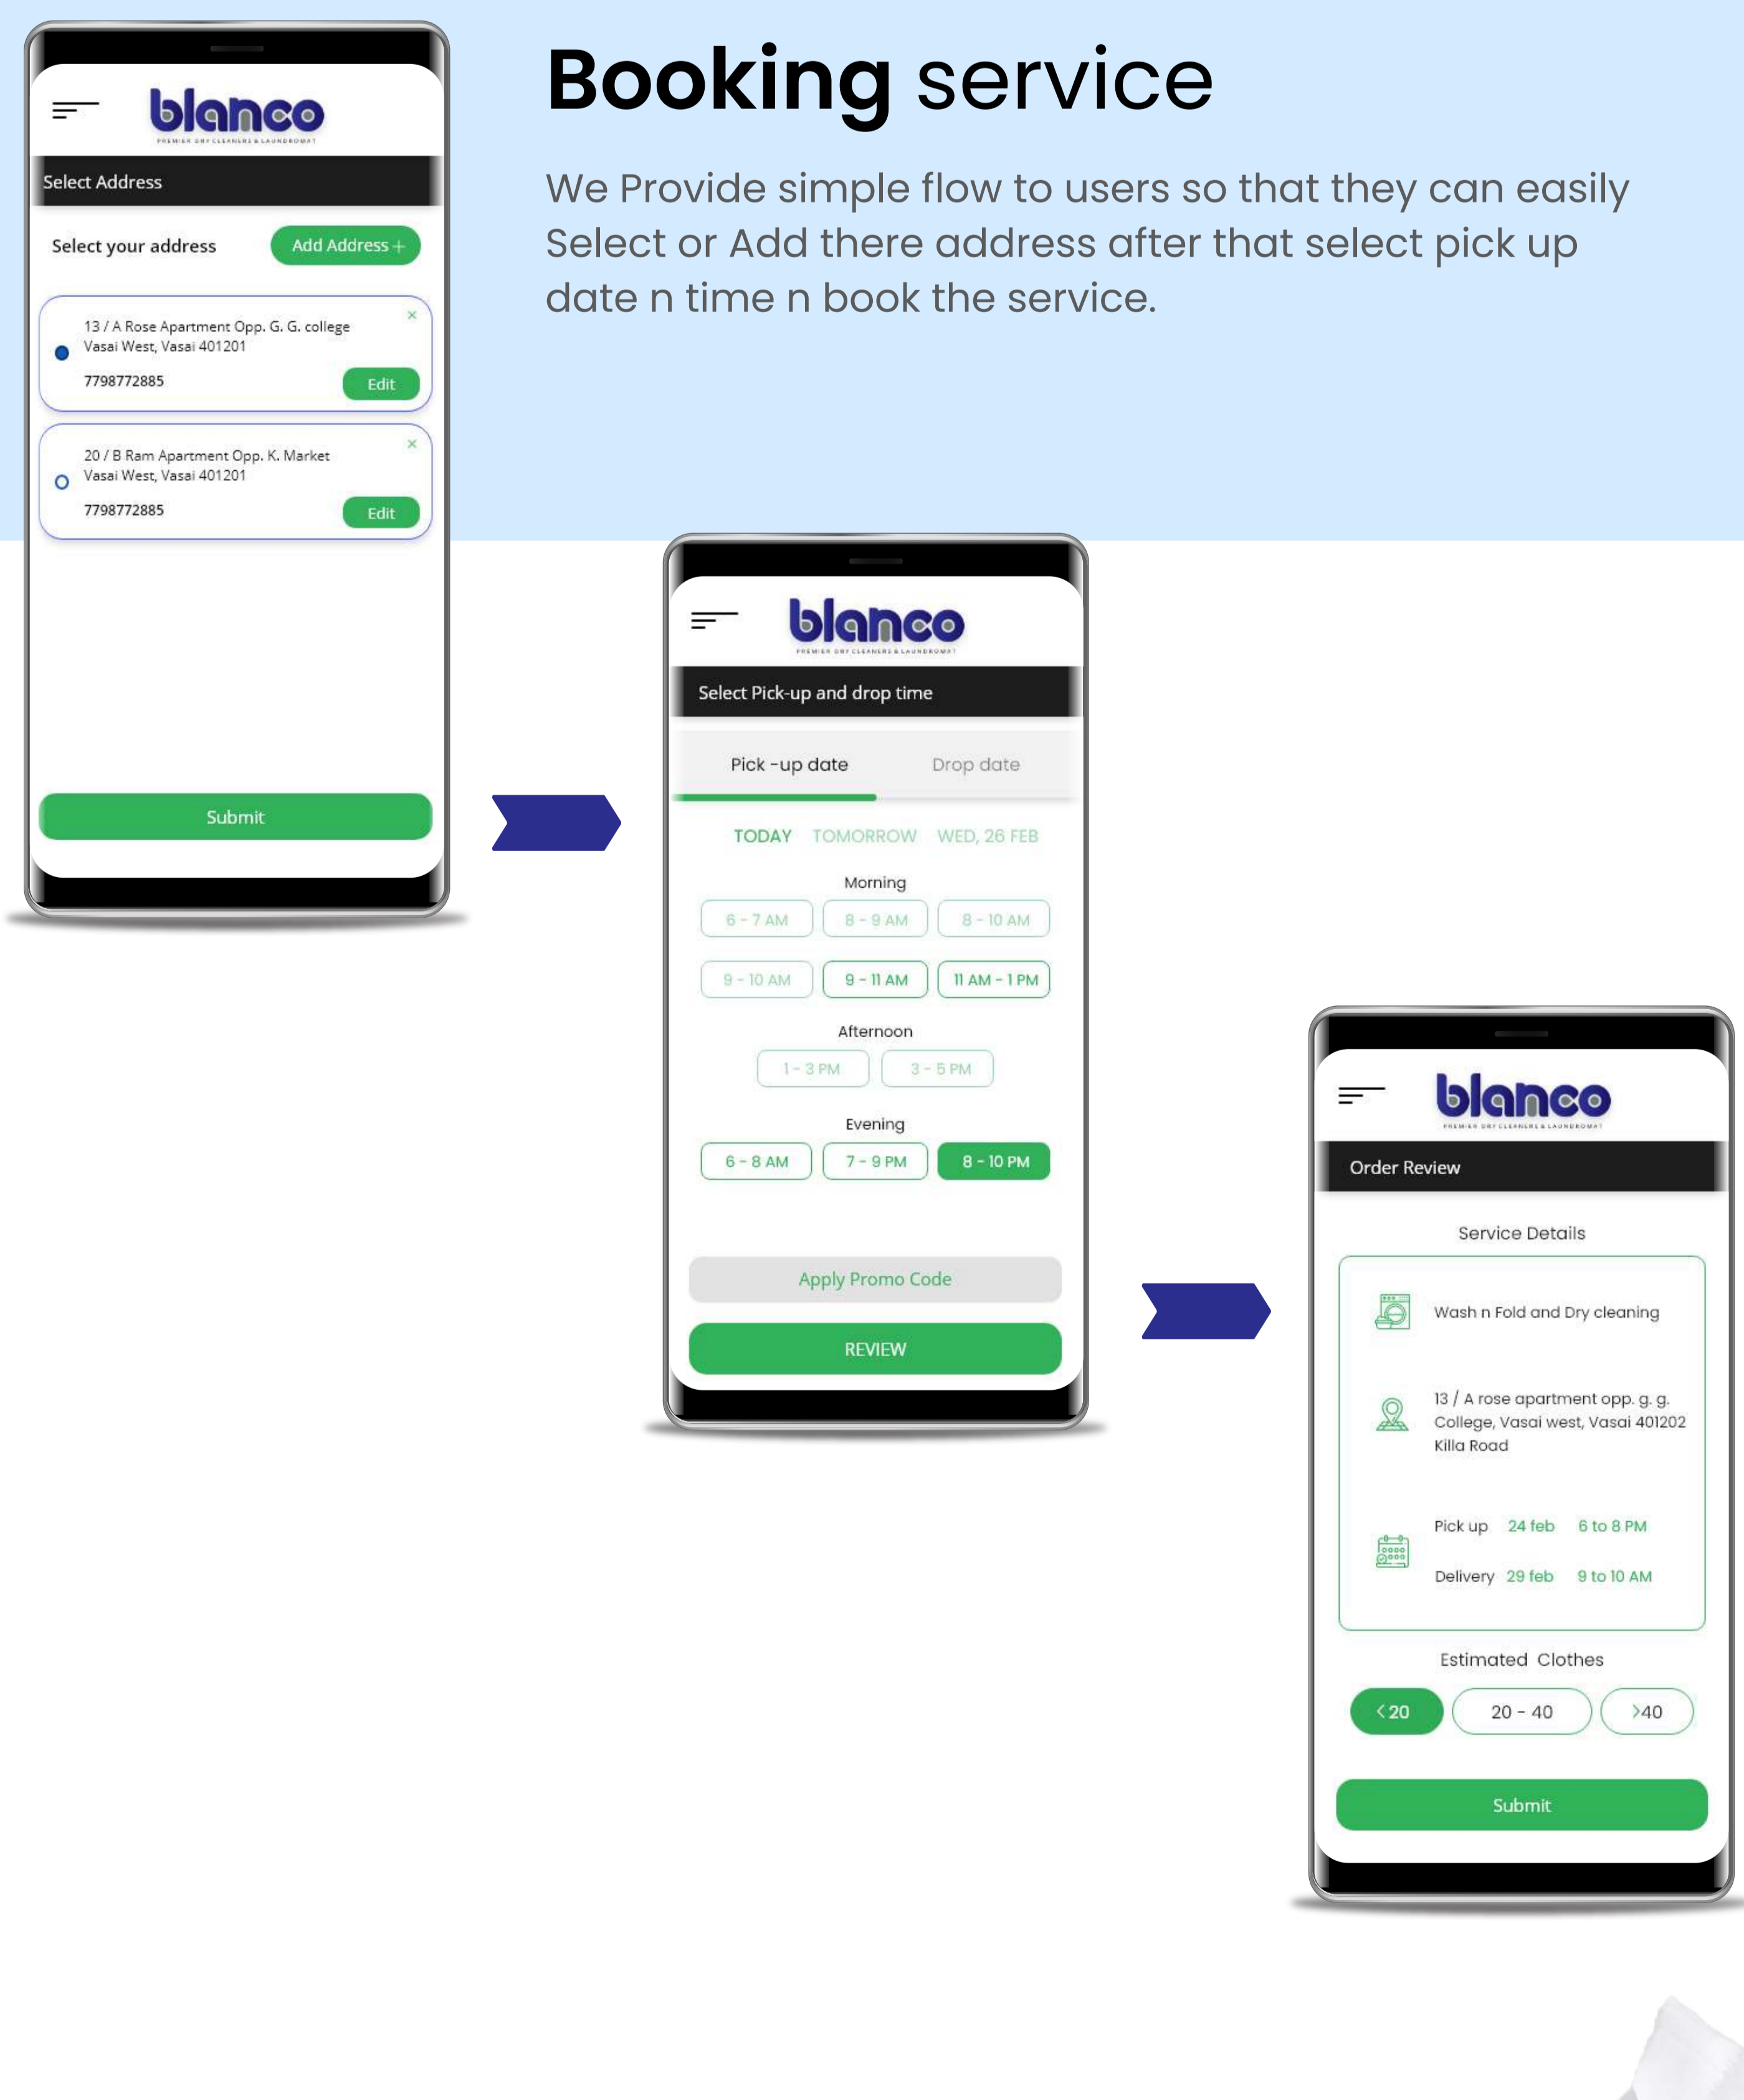

## Price List

We design the Price list page as simply as possible so users can understand the rates of every product. we provide white n blue strips so that user not get confused.

## Booking service

We Provide simple flow to users so that they can easily Select or Add there address after that select pick up date n time n book the service.

Thank you
